01

Introduction of advanced probes. Exquisite process measurement is more accurate.

02

A second rapid temperature measurement.
No longer need 5 minutes to take temperature, quick and easy.

Introduction of advanced probe technology, the exquisite craft a second automatic scanning 8 times, a second rapid temperature measurement, the baby does not cry no, the measurement of temperature is more convenient and quick.

03

Collect skin spontaneous infrared, the machine itself does not emit.

Radiation, no radiation.

When measuring the temperature, the sensor collects infrared measurements from the forehead, and the machine itself does not emit any radiation.

The error value is not exceeded.
